

CHEETA Label Dispenser

CHEETA Label Dispenser is a Perfect System to Label, Organize and Track your Sterilized Packs.

Easily Comply with Infection Control Guidelines!
Save Time. Legibility. Traceability. Accountability

As a result of certain provincial regulation changes, staff responsible for sterilization processing are now required to add their initials on each pack. **CHEETA's** Label Dispenser comes with provision to include Operator Initials printed directly onto label.

Starter Kits*

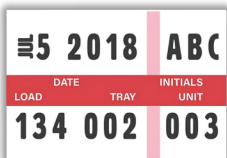

Starter Kit Includes:
1 Label Dispenser, 12 Rolls of Labels & 2 Ink Rollers

FEATURES

- Compact, easy to set, easy to load, and easy to dispense.
- Indicator strip changes colour after sterilization has taken place.
- Unique ability to print operator initials, along with the date, load, tray, and unit number.
- High-quality refill labels are cost-effective, and designed for durability.
- Manufactured in Italy and built to last.

Dispenser Options

Load I.D., User Initials
Date, Load, Tray, and
Unit number

Sterilization Load I.D.
and Date only

Applying Dual-Ply Labels

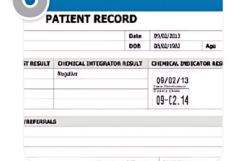

1 Place On Pouch

2 Peel Off Pouch

3 Place On Records

We suggest using a different colour label for each sterilizer.

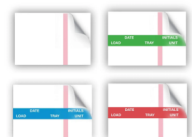

Refillable Labels

Single-Ply Labels:

Apply the label to the package before or after sterilizing to track the date of sterilization and the load number.

Label Refills include: 1000 labels/roll; 12 rolls per pack

Dual-Ply Labels:

Apply the dual-label to the pack to be sterilized. After sterilization, remove the top portion of the label and place it directly onto your patient's record or logbook.

Label Refills include: 500 labels/roll; 12 rolls per pack
